### About College of Nursing

College of Nursing, AIIMS Bhubaneswar was established in the year 2013 with the aim to have excellence in nursing education, training, practice and innovative research with professional values to contribute towards a healthy society. The institute offers short-term certificate, graduate, post-graduate and PhD in Nursing. Since its establishment, it has gone from strength to strength and developed as one of the esteemed institutions having highly qualified faculty with state-of-the-art classrooms, specialty labs, regional simulation lab and clinical teaching facilities with 75 seats in B.Sc. (Hons.) Nursing and 25 seats for M.Sc Nursing with specialties including Medical-Surgical Nursing, Psychiatric Nursing, Community Health Nursing, Obstetrics and Gynecologic Nursing, and Pediatric Nursing.

### About the Workshop

Fire Disaster preparedness involves identifying risks, creating plans and policies, developing education and training programs, mock drills and exercises for readiness. It also include preparing the healthcare system for response, and increasing knowledge and preparedness among healthcare providers regarding fire disaster in hospital. Roles of nurse during disaster management include to determine the magnitude of the event, define and understand the health needs of the affected groups, prepare the priorities and objectives, identify actual and potential public

health problems at the earliest, and estimate resources needed to respond to the needs identified.

As the member of healthcare team, when nurses take part in fire disaster preparedness it helps them to equip with fire safety skills such as recognizing fire hazards, perform fire risk assessment, taking action in preventing fires, and actively respond in case of any fire emergency in the hospital.

### General objective:

At the end of the workshop, the delegates gain in-depth knowledge on fire disaster preparedness in hospital, and demonstrate life-saving skills when emergency occurs in the hospital with positive attitude.

### Specific Objectives:

At the end of the workshop the delegates are able to:

- Illustrate disaster management plan.
- Demonstrate basic life support during disaster.
- Apply triaging principles during disaster.
- Explain the communication system during disaster crisis.
- Describe patient evacuation methods during disaster in hospital.
- Appreciate the post disaster rehabilitation.
- Demonstrate fire safety measures for health care organization.
