Postgres Plus® Enterprise Edition

9

Postgres Plus Enterprise Edition is the best database and tools package for enterprise performance, scalability, high availability, management and application development available today in the PostgreSQL ecosystem.

Analyst Views

EnterpriseDB is positioned in the Leaders Quadrant in Gartner's Magic Quadrant for Operational Database Management Systems

Who's Saving Now?

Jonathan

Enterprise Database Features and Value

Postgres Plus Enterprise Edition is the most powerful open source based database and tools package designed specifically for large enterprises and workloads.

Enterprise Edition addresses the needs of the organization, DBAs, and developers with Postgres Plus Advanced Server, Postgres

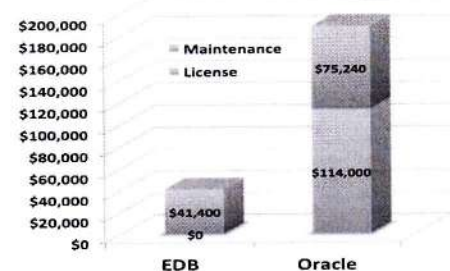

Enterprise Manager, xDB Replication Server, Failover Manager, SQL/Protect and Migration Toolkit.

Enterprise Edition is helping thousands of organizations of all sizes and missions reduce their reliance on and high costs associated with traditional database systems.

Unbeatable Cost Savings

Do all your applications justify high prices when an option exists that is just as capable as your database? EDB's costs have no CAPEX license fee. An annual subscription includes licenses, support, maintenance and tools for monitoring, high availability, replication, partitioning, diagnostics and tuning. Does it make sense to pay more and get less for a substantial number of your applications?

3 Year TCO for 2 Socket x 4 Core Hardware (includes 40% discount for Oracle License Fee)

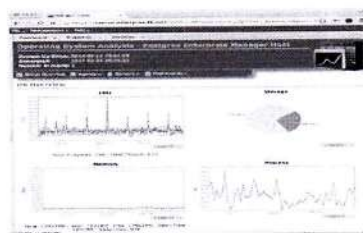

Postgres Plus Advanced Server

Advanced Server has all the features and updates of community PostgreSQL plus features for enterprise performance and security, developer and DBA tools, and compatibility with Oracle databases. Built upon the most advanced open source relational database, Advanced Server adds

features and tools designed for the same enterprise workloads as the traditional databases in use today. When you look at the high costs of a traditional database vendor, it becomes clear that there is a place for open source based databases in every data center.

EDB Postgres Enterprise Manager

Enterprise Manager delivers all the enterprise-class tools necessary for administering, monitoring and tuning large scale Postgres deployments from a single graphical console. Other tools include Postgres Expert, Index Advisor, SQL Profiler and more.

Postgres Plus Enterprise Edition

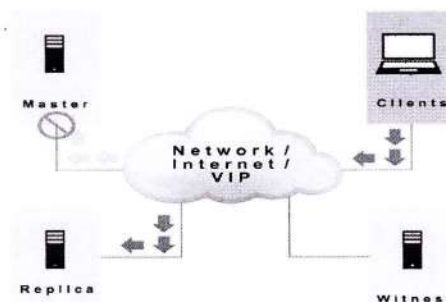

8

Enterprise Edition Subscription Details

- Postgres Plus Advanced Server
- Postgres Enterprise Manager
- EDB Failover Manager
- EDB xDB Replication Server for both single and multi-master configurations
- EDB Migration Toolkit
- EDB SQL/Protect guards against SQL injection attacks
- EDB Update Monitor
- Software / Security Updates
- Severity 1 Bug Escalation & Hot Fix
- 24 x 7 Technical Support
- 1 Hour Response Goal
- 4 Named Support Contacts
- Unlimited Incidents
- PDF Documentation
- KnowledgeBase
- Software Archive
- Premium Technical Webcasts

EDB Failover Manager

EDB Failover Manager creates fault tolerant database clusters to minimize downtime when a master database fails by keeping data online. Failover Manager provides the cluster health monitoring, node & database failure detection, and automatic failover mechanisms needed for integration into a variety of stringent 9s high availability solutions.

xDB Replication Server is a versatile tool for disaster recovery, scalability, availability, and performance solutions. **Single-master** replication can be used for moving data between Postgres Plus Advanced Server, PostgreSQL, Oracle and SQL Server.

Multi-master setups provide read scalability and write availability for geo-dispersed databases. Replace a single overloaded master that consolidates regional data with multiple masters in each region that improve local write performance while providing consolidated data access in near real time.

Migration Toolkit

The Migration Toolkit provides fast, flexible, and customized migration of database objects and data to an Advanced Server database from Oracle, MySQL, Sybase, or SQL Server. By consolidating the number of

databases in use, you can reduce in-house administrative costs. By consolidating onto a lower cost platform you free up IT budget for other more important initiatives.
