Ref: NOA No. HLL/PCD/PMSSY/AIIMS-II/14-RT-01/16-17/4427 dated 31.03.2017 for Medical Gas Pipeline System work for AIIMS, Bhubaneswar for 6 AIIMS under PMSSY.

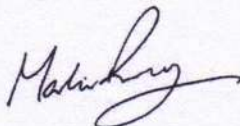

Dear Sir,

This is to inform you that the consumption of medical gases has gone up by many folds on account of increase in the outlets of medical gases in various areas of the hospital, (which were not in the original scheme - NOA). The increase of outlets has led to a substantial increase in the generation and the flow rate of the gases. The installed system is not capable of generating the volumes desired on account of this increase.

In order to ensure uninterrupted supply of medical gases and to negate the possibility of its failure due to high demand and consumption, the existing installed system shall have to be complimented with additional equipment like air compressors and vacuum pumps; else the overloaded system may break down and create unwanted problems which may lead to disruption of supplies.

To negate the possibility of a breakdown of the installed equipment, we strongly recommend an immediate installation of 3 No's Vacuum systems with bacterial filters and 3 No's air compressors with dryers.

Please find attached the consolidate matrix of gas outlets (as proposed- quantity in the NOA) v/s. (as built, quantities installed / proposed to be installed).

Item Description	Outlet Quantity as per NOA	Amended Outlet Quantity	Additional Outlets supplied / installed
Medical Air 4 Outlet	300 Nos.	883 Nos.	583 Nos.
Medical Air 7 Outlet	0	06 Nos.	06 Nos.
Vacuum Outlet	1100 Nos.	1572 Nos.	472 Nos.

Our Proforma invoice for Medical Air Plant and Medical Vacuum Plant is attached for your ready reference. Kindly issue us a formal order to enable us to supply the same.

Thanking you and assuring you of our best services and attention at all times.
