AIIMS BHUBANESWAR (AIIMS BBSR) invites Expression of Interest (EOI) for converting the present BSL-2 lab to BSL-2 Plus with negative pressure from same or similar work experienced firms who worked in reputed Govt. or private institute.

**Location of work:** At Lab room of AIIMS, BBSR having dimensions 18' x 14' x 8' (L x B x H) in the Dept. of Microbiology, AIIMS, Bhubaneswar.

Last date & time of submission of EOI Documents at AIIMS Bhubaneswar is **on or before 28-04-2021 up to 03.00 pm**. The EOI document can be downloaded from AIIMS Bhubaneswar website is [www.aiimsbhubaneswar.nic.in](http://www.aiimsbhubaneswar.nic.in)

**EOI to be submitted to:**

**Sr. Procurement-cum Store Officer**

All India Institute of Medical Sciences (AIIMS), Bhubaneswar  
Sijua, Patrapada, Bhubaneswar, Odisha 751019  
All India Institute of Medical Sciences (AIIMS), Bhubaneswar

**1.1 OBJECTIVE, SCOPE OF WORK & SPECIFICATIONS:**

**The scope of work and specifications are as follows:**

Converting the present BSL-2 lab to BSL-2 Plus with negative pressure with the following specifications:

- a. Supply of AHU
- b. Exhaust AHU
- c. AHU Control Panel etc.

**Technical Specifications of BSL 2 Plus laboratory facility with Negative Pressure:**

**a. Supply AHU:**

- Capacity: 3000 CFM
- Double skin AHU complete with mixing box, Cooling coil, fan, volume control dampers for Supply, fresh air, fresh air filter.
- Static Pressure (mm wg) - 100
- Construction – 28 mm Puf Moulded Double Skin Detachable Panels
- Structural - Extruded Spl Alloy Al Profiles filled with PUF
- Panel - External Skin - 0.6 mm Pre plasticised Sheet
- Panel - Internal Skin - 0.6 mm Plain GI Sheet
- Insulation Material/thickness - 25mm Thick Puff with 45kg/m<sup>3</sup> density
- Fan Make & Type - Nicotra/Kruger make or equivalent DIDW Backward Curve Centrifugal Fan
- Fan Wheel size & No. of Fans - RDH 315R #1
- Fan Speed in RPM – 2381, Critical Fan Speed in RPM – 3100
- Fan Outlet Velocity in mps - 8.68
- Motor
- Drive Arrangement - Taper Lock Pulleys for Fan & Motor Both
- Type of Balancing/Test Procedure - Statically & Dynamically/AMCA Tested
- Type of Vibration Isolators - Rubberized Mounts
- Filters Provision - Pre Filters & HEPA filters
- Coil Type - Cooling Coil
- Coil Surface Area - Sq. ft - 6.11
- No. of. Coil Rows- 6

- Face Velocity Across the coil - 491
- Coil Specification - 1/2 " OD 27SWG Copper & 36 SWG Al Fin at FPI
- Canvass - SRF make Flexible Fire Retardant Canvass
- Hardware - Galvanized, Operation Wt (Kgs) - Aprox – 240

#### **b. Exhaust AHU**

- Capacity: 4000 CFM
- Double skin AHU complete with mixing box, volume control dampers for return, fresh air
- Static Pressure (mm wg) - 100
- Construction - 28mm Puff Moulded Double Skin Detachable Panels
- Structural - Extruded Spl Alloy Al Profiles filled with PUF
- Panel - External Skin - 0.6 mm Pre plasticised Sheet
- Panel - Internal Skin - 0.6 mm Plain GI Sheet
- Insulation Material/thickness - 25mm Thick Puff with 45kg/m<sup>3</sup> density
- Fan Make & Type - Nicotra/Kruger make DIDW Backward Curve Centrifugal Fan
- Fan Wheel size & No. of Fans - RDH 315R #1
- Fan Speed in RPM - 2381
- Critical Fan Speed in RPM – 3100
- Fan Outlet Velocity in mps - 8.68
- Motor
- Drive Arrangement - Taper Lock Pulleys for Fan & Motor Both
- Type of Balancing/Test Procedure - Statically & Dynamically/AMCA Tested
- Type of Vibration Isolators - Rubberized Mounts
- Filters Provision - Pre Filters, HEPA filters Hardware etc.

#### **c. AHU Control Panel**

**Ducting:** Ventilation ducting will be made out of minimum 24-gauge GI sheet, exhaust duct from the lab to the AHU will be 24 Gauge GI Duct. All the ventilation ducting including return air riser will be leak proof. Insulation material with Nit Rile foam/cross linked Polyethylene material (Aluminum Foil insulation)

**Condensing unit:** Supply and Installation of Condensing unit with 11 Tr capacity (5.5 x 2 Nos) Including, Gas, Copper tubing, Drier & expansions valves etc

**Dampers:** Galvanised steel Volume controlled damper, Opposed / parallel Blade Dampers are used to carry out a rough air system balance with closer control being carried out at the individual grilles or diffusers.

#### **Supply & Return air grills**

MOC: CRCA powder Coated, 1.2 mm thick with perforation

**Ceiling Panel:** Modular ceiling: Modular ceiling will be made for Clean Room application, pre-engineered 50 mm thick PUF panels with PCGI Sheets with PUF insulation of minimum 38-40 kg/m<sup>3</sup>. Both surfaces should be power coated 0.6 mm thick PCGI sheet and will be installed along the outer walls, partitions and false ceiling to create an impervious shell which is fully sealed.

**Modular wall:** Modular wall will be made for Clean Room application, pre-engineered 50 mm thick PUF panels with PCGI Sheets with PUF insulation of minimum 38-40 kg/m<sup>3</sup>. Both surfaces should be power coated 0.8 mm thick PCGI sheet and will be installed along the outer walls, partitions and false ceiling to create an impervious shell which is fully sealed.

**Covings:** Extruded aluminium anodized R75 clip-on type (Male & Female connectors) covings for entire wall to floor, wall to wall & wall to ceiling joints. Extruded aluminium double cove integrated with top track of the partition panels. Corner internal & external cove joining pieces in aluminium anodized finish. Having similar construction and finish as the walls and properly sealed with silicon sealant with wall & ceiling.

#### **Modular Clean Room Door:**

Flush Door finishes shall be 50 mm thick 1.2mm thick PCGI sheet suitable to fix on 50 mm thick wall panel with provisions for double glazing glass for all door and hardware like push plate. PUF Panels will be with PCGI Sheets, powder coated on both sides and PUF insulation of minimum 38-40 kg/m<sup>3</sup>. Concealed hardware for fixing of door frames, door closure, SS hinges, SS Door handle, SS ball bearing butt hinges, automatic drop seal, concealed tower bolt for the double door, both sides lock and key arrangement etc

**Size: (Single door) 915 x 2100 mm**

#### **Differential Pressure Gauge:**

Supply, Installation of Dwyer make Magnahelic Pressure gauges 0 – 10 mm for monitoring differential room pressures.

**Epoxy Flooring:** Flooring shall be of 3 mm of industrial epoxy including screed compound for adhesion with bubble free perfect smooth finishing completed into two steps: Hardening and smoothening. Epoxy used for this application will be self-levelling and clean room compatible.

#### **Epoxy coving:**

#### **3 door interlocking system**

**Static Pass box:** MOC: SS 304 Size: 2' x 2' x 2', Door, Interlocking system, UV light, Fluorescent Lamp etc.

**Electricals:** All the required panels, cabling, switchgears, surge and spike protection system and arrangements etc. for the purpose of energizing the BSL-3 Laboratory facility All the electrical fittings and fixtures in the laboratories areas shall be suitable for clean room application and shall be sealed (all conduits, outlets shall be sealed with silicon sealant), leak proof and capable to withstand chemical exposures during fumigation.

- Note:**
- (i) All work should be done on turnkey basis
  - (ii) Work Manuals, Test certificates, Drawings, List of Spare parts and Validation certificates to be provided.
  - (iii) Warranty is for 05 years and CMC is for 05 years as per AIIMS, BBSR rule.
  - (iv) - The interested agencies may visit the actual site for getting necessary details

Kindly note that the views presented above is the proposed plan and basic concept of lab and subject to modifications for improvements. However, decision of technical committee constituted by AIIMS BBSR will be final in this respect.

## **1.2 INSTRUCTIONS TO THE BIDDERS**

### **1.2.1 Information to Bidders about Two Stage Bidding**

To meet the desired objectives of a transparent procurement that ensures value for money simultaneously ensuring upgradation of technology & capacity building- it is prudent to invite a two-stage Expression of Interest (EoI) Bid and proceed to explore the market and to finalize specifications based on technical discussions/ presentations with the experienced manufacturers/ suppliers in a transparent manner.

**Expression of Interest (Eol) bid has been invited due to following situations:**

01. It is not feasible for the Procuring Entity to formulate detailed specifications or identify specific characteristics for the subject matter of procurement, without receiving inputs regarding its technical aspects from bidders;
02. The character of the subject matter of procurement is subject to rapid technological advances or market fluctuations or both;
03. The bidder is expected to carry out a detailed survey or investigation and undertake a comprehensive assessment of risks, costs and obligations associated with the particular procurement.

The procedure for two stage bidding shall include the following :

01. In the first stage of the bidding process, the Procuring Entity shall invite Eol bids containing the broad objectives, technical and financial eligibility criteria, terms and conditions of the proposed procurement etc. through advertised tenders containing the technical aspects and contractual terms and conditions of the proposed procurement without a bid price. On receipt of the Expressions of Interest, technical discussions/presentations may be held with the manufacturers/ suppliers by the Committee, giving equal opportunity to all such bidders to participate in the discussions.

During these technical discussions stage the Procurement Entity may also add those other stakeholders in the discussions who could add value to the decision making on the various technical aspects and evaluation criteria.

Based on the discussions/ presentations so held, one or more acceptable technical solutions could be decided upon laying down detailed technical specifications for each acceptable technical solution, quality benchmarks, warranty requirements, delivery milestones etc., in a manner that is consistent with the objectives of the transparent procurement. At the same time care shall be taken to make the specifications generic in nature so as to provide equitable opportunities to the prospective bidders. Proper record of discussions/ presentations and the process of decision making should be kept;

02. In revising the relevant terms and conditions of the procurement, if found necessary as a result of discussions with the shortlisted bidders, the Procuring Entity shall not modify the fundamental nature of the procurement itself, but may add, amend or omit any specification of the subject matter of procurement or criterion for evaluation.

03. In the second stage of the bidding process, the Procuring Entity shall invite bids from all those bidders whose bids at the first stage were not rejected, to present final bid with bid prices in response to a revised set of terms and conditions of the procurement;

04. Any bidder, invited to bid but not in a position to supply the subject matter of procurement due to modification in the specifications or terms and conditions, may withdraw from the bidding proceedings without forfeiting any bid security that he may have been required to provide or being penalized in any way, by declaring his intention to withdraw from the procurement proceedings with adequate justification.

05. If the Procuring Entity is of the view that after Eol stage, there is likelihood of further participation by many more bidders and to avoid getting trapped into a legacy technology, the second stage bidding may not be restricted only to the shortlisted bidders of Eol stage and it may be so declared in the Eol document ab-initio. Thereafter in the second stage, normal OTE/ GTE bidding may be done. Such variant of Eol is called 'Non-committal' Eol. It shall be decided if recommended by Committee and approved by Competent Authority.

### 1.3 DOCUMENTS TO BE SUBMITTED

| Sl. No. | Particulars                                                                                          | Documents to be attached<br>Wherever applicable. |    |          |
|---------|------------------------------------------------------------------------------------------------------|--------------------------------------------------|----|----------|
|         |                                                                                                      | Yes                                              | No | Page no. |
| 1.      | Name, Address, email and telephone number of the Agency / firm / company in the letter head          |                                                  |    |          |
