● CHROMagar™ Candida Plus

Pour la détection et la différenciation des
espèces cliniques majeures de *Candida*,
incluant *C. auris*

● CHROMagar™ Candida Plus

www.CHROMagar.com

For detection and differentiation of major clinical *Candida* species, including *C. auris* 99

Background

The *Candida* are yeasts involved in various infections called Candidiasis, which can affect damaged skin, respiratory tract, digestive and urogenital systems. These Candidiasis can be severe with significant morbidity for nosocomial infections or in immunocompromised patients. Although *C. albicans* is still the main species involved, the use of antifungal agents has given rise to other species such as *C. tropicalis*, *C. krusei* and *C. glabrata*.

In 2016, The World Health Organization added to this list *C. auris*, with a prevalence of over 90 % resistant to fluconazole. In addition, some strains are multidrug resistant to amphotericin B, voriconazole, and/or echinocandins.

It is recommended to carry out an early diagnosis of *Candida* in order to provide specific treatment as quickly as possible. *Candida* can be isolated by swabbing the skin, throat, rectum, or urogenital tract.

CHROMagar™ Candida Plus is the first chromogenic isolation medium to detect and differentiate *C. auris* in addition to other major clinical *Candida* species such as *C. albicans*, *C. tropicalis*, *C. glabrata* or *C. krusei*.

Medium Performance

1 HIGH SPECIFICITY

Differentiation of the most common *Candida* species with very high specificity:

C. albicans ≈ 100 % *

C. tropicalis ≈ 100 % *

C. krusei ≈ 100 % *

2 UNIQUE MEDIUM TO DIFFERENTIATE *C. auris* FROM OTHER CANDIDA SPECIES

Owe to its high specificity, it can be used also as a screening tool in case of outbreaks.

For *C. auris*: Specificity ≈ 100 % *
Sensitivity ≈ 100 % *

* Specificity and Sensitivity from scientific study: «Evaluation of a novel chromogenic medium for *Candida* spp. identification and comparison with CHROMagar™ Candida for the detection of *Candida auris* in surveillance samples» Juan V. Mulet et al., 2020.

3 EASY IDENTIFICATION

Identification by MALDI-TOF can be carried directly from a colony. No need of subculture.

Medium Description

Powder Base	
Total	50.9 g/L
Agar	15.0
Peptones	11.0
Chromogenic and selective mix	24.9
Storage at 15/30 °C - pH: 6.1 ± 0.2.	
Shelf Life	> 12 months

Usual Samples	Skin, throat, armpits, urogenital tract and rectal swab.
Procedure	Direct Streaking. Incubation 36-48 h, 30-37 °C. Aerobic conditions.

GeM Availability Report and Past Transaction Summary

GeM Availability Report and past transaction summary report is generated based on the specifications searched by the Buyer. The specification may be modified appropriately for searching relevant categories on GeM. Buyer may navigate to GeM category page by clicking on the category link to view category specifications and products/services available in the category.

Order Count and Order Value displayed is on a cumulative basis since GeM inception.

1. Search String: CHROMagar Candida PLUS

Search type: Product

1. There are categories available on GeM matching your requirements (as listed here). You can create a bid on GeM with a product closest matching your required specifications and add additional parameters in specifications through Corrigendum using RMS functionality.
2. If you feel that category TP needs updating you can submit category updating request also through RMS.
3. If you do not want to use any of the above option and want to proceed for procurement outside GeM, please suggest the specifications of the required product for creation of new category on GeM for future procurement.

Search Result: Category available/suggested on GeM but marked as "not matching requirements" by the buyer with undertaking as under:

It is certified that I have thoroughly checked all probable categories suggested by GeM and I am satisfied that the product required is not covered / does not fall in any of the suggested categories and can not be procured under any of these categories even after inclusion of List of Values(LOV) wherever possible in category specifications of suggested categories. It is also certified that the technical specification requirement are such that these can not be covered even by adding specification parameters using ATC in any of the GeM suggested categories. This is a one-time requirement hence new category creation is not proposed / or requirement is recurring but request for new category creation will be submitted separately post generation of GeMARPTS.
